

Job Description

Job Title:	Cranker	Grade	1
Department:	Glazing Department	Location	<i>Dalehall</i>
Reports to:	Glazing Managers	Issue Date	
		Review Date	

Purpose

To remove the ware from either the drier, sprayline, or ware board and place in the correct crank and rod, whilst avoiding any damage to the ware, at a pace equal to the required output for that operation.

In addition to these functions employees are required to carry out such other duties as may reasonably be required.

Requirements for the job

Qualifications/Education required: Ability to read and write.

Experience Required: Comprehensive training programme due to the pace of work, either at a previous employer or in house.

Specialist Training: Must be fully trained.

Nature and Scope

Reporting to: Machine supervisor, Aero supervisor, Glazing Managers.

Managing: N/A

Key relationships with: Machine Supervisor, Crank Builder, Kiln Supervisor.

Principle Accountabilities

- To keep pace with the production output as necessary.
- To immediately inform Management of any problems.
- To ensure the ware is not damaged whilst cranking.
- To ensure that the crank is suitable for use/moving to the kiln.
- To comply with Health & Safety regulations and maintain a good standard of housekeeping.
- Ensure at all times that the work area is clean, tidy and safe.

Stepping up to the plate

- To carry out all duties within the scope of the Company mission and values and to support and encourage practices to meet this end.
