

a passion to inspire

Castle Chafer

Castle Chafer™

NEW RANGE

The new Chafers by Castle are a unique and energy efficient way of storing both wet and dry foods in food service. Whether it's breakfast or buffet service, storing hot or cold food, the Castle chafing dish will maintain your food at the perfect temperature to ensure that your customer is served your food exactly how you want.

How Castle chafers compare to standard chafing dishes:

CASTLE CHAFER	STANDARD CHAFER
Requires 1 castle fuel can for 16 hour running time	Requires 16 gels & 2.5 litres of water for 16 hours running time
Unit is fully insulated so heat retained where the food is. Also keep food chilled	Unit not insulated
Retains heat for 30 mins when gas runs out	No reserve heat
Unit has rubber feet to stop it moving around	No rubber feet
Easy to set up as no boiling water required	Boiling water required
No fuel smell	Fuel smell
Heat source fixed to prevent accidents	Fuel gel can be knocked over

Features, Benefits & Care Guidelines

- Holds 50% more food so doesn't need to be refilled as often
- It is cheaper to run due to its insulation properties
- 75% more efficient than traditional chafing dishes as there is no gas wastage
- Easy to move when hot, just turn the gas off and relocate

The Chafing dish is made of stainless steel and is best cleaned by wiping with a damp cloth. The Castle Chafer frame and lid can be cleaned and polished with warm water and soap. It is recommended that the unit is rinsed fully after every service.
